Coloured Rock Innovation

RockinColour™ is a colour coated stone™ ideal for decorative features, plant pot topping and as a colourful background when laid among plants.

RockinColour™ stones have been exposed to accelerated weathering conditions (ISO 16474-1 and 3:2013 and ISO 6270-2:2005). A top up is recommended biennially to refresh the display.

	Midnight Black	Oak Gold	Plum Red	Azure Blue	Lime Time	Emerald Green	Chilli Red
Time	0 hours	0 hours	0 hours	0 hours	0 hours	0 hours	0 hours
Grade	0	0	0	0	0	0	0
Time	3000 hours (≈3 years outdoors)	3000 hours (≈3 years outdoors)	3000 hours (≈3 years outdoors)	2750 hours (≈2.5 years outdoors)	2000 hours (≈2 years outdoors)	2000 hours (≈2 years outdoors)	2000 hours (≈2 years outdoors)
Grade	2	2	2	3	3	1	2

Grade is the visual assessment of defects according to ISO 4582:2007, where 0 = none, 1 = barely perceptible, 2 = slight, 3 = moderate, 4 = substantial.

Due to the nature of the product, stone breaking/chipping is to be expected over time. RockinColour™ is not suitable for driveways or any other trafficked areas as this will accelerate the wearing and breaking of the stones. Gridmats may be used to protect the stones for pathway applications if the stones are placed just below the top edge of the grid so that they are away from surface contact from traffic.
